Subject: Bio-Tech Food Labeling

7801 '99 JUL 12 A10:17

I am writing you to solicit your support in the fight to keep the FDA from eliminating labeling of irradiated foods. And, to promote and demand the labeling of all bio-tech foods, an example being the rbGH from Monsanto.

As a resident of the State of New Jersey, too many of our citizens have cancer; our children need not have this in their future unknowingly. Please help future generations by providing consumers with a right to choose.

Thank you.

Jane W. Meredith -
